2 datasets:

- Text embedding to CLIP embedding

- CLIP embedding to Image embedding

Our dataset:

## What is COCO?

COCO is a large-scale object detection, segmentation, and captioning dataset. COCO has several features:

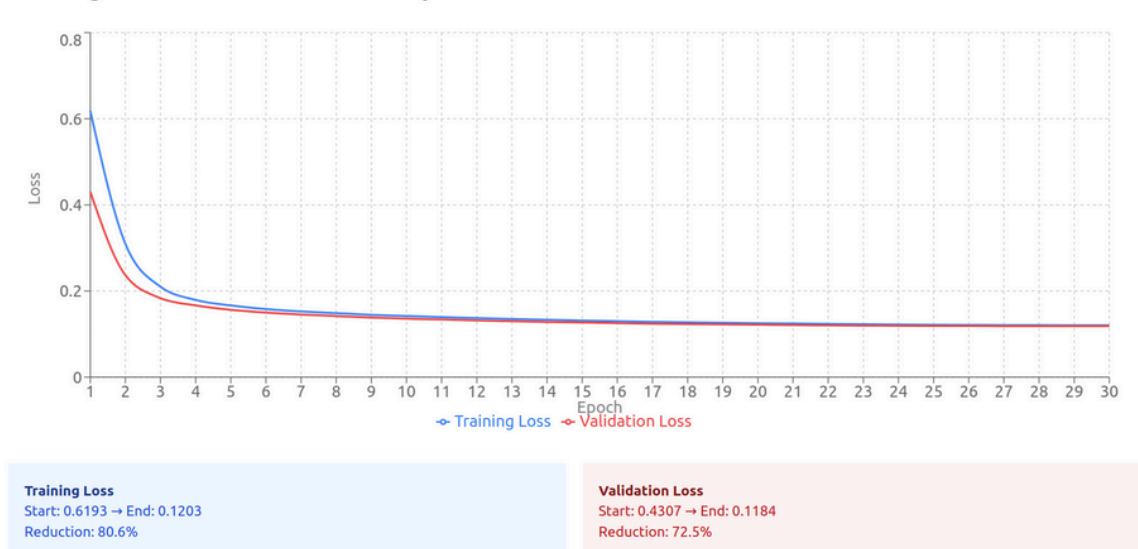

- ✓ Object segmentation
- ✓ Recognition in context
- ✓ Superpixel stuff segmentation
- ✓ 330K images (>200K labeled)
- ✓ 1.5 million object instances
- ✓ 80 object categories
- ✓ 91 stuff categories
- ✓ 5 captions per image
- ✓ 250,000 people with keypoints

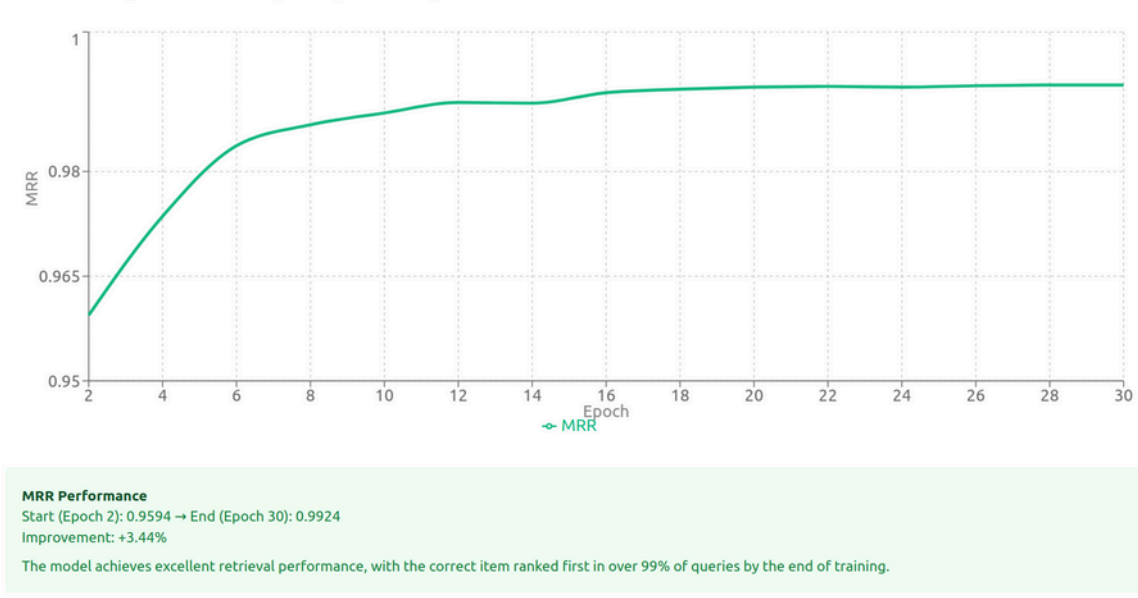

# TRAINING METRICS

## Encoder

Training and Validation Loss Over Epochs

Mean Reciprocal Rank (MRR) Over Epochs

## Decoder

Training and Validation Loss Over Epochs

Mean Reciprocal Rank (MRR) Over Epochs
